Technical specifications

According to space requirements, the wire act can be done on a regular wire, or a self supporting wire. Please refer to the following technical specifications to determine which wire would suit your situation.

Regular wire :

- the possibility to install two anchors able to support 2 tons (4400 lb/2000 kilos) each;
- a minimal 9m (29 ft) of distance between each anchor;
- a clearance of 1m50 (5 ft) in width;
- a minimal clearance of 4m20 (14 ft) in height.

Self supporting wire :

- a minimal of 4m30 (14 ft) in length;
- a clearance of 1m60 (5 ft) width;
- a clearance 4m50 (15 ft) in height.

For the sake of clarity, please refer to the downloadable plan. Those specifications are for a general idea, the wire and the act can be adapted to different environments. For further details, please contact Madeleine.
